PROFILE

Detail-oriented Software Engineer seeking a role in building scalable software solutions using Django and FastAPI for REST API development. Experienced with Azure Databricks, Azure Cloud Platform, and Data Factory pipelines for data-driven application orchestration. Dedicated to delivering clean, efficient code and contributing to robust, cloud-native systems.

SKILLS

- **Technologies**: Python, Flask, FastAPI, MySQL, Red Hat Linux, Azure Cloud Services, Data Factory Pipeline, CI/CD
- **Tools:** Postman, Apache JMeter, Azure, Putty (Latest), PyCharm, VS Code, Databricks

EXPERIENCE

Capgemini *Pune, India*

Software Engineer July-2025– Present

- Developed a REST API as a common utility to trigger Azure Data Factory pipelines for orchestration.
- Implemented dynamic execution of Data Factory pipelines to perform data transformations in Databricks.
- Transformed and ingested data from multiple sources across different regions into the warehouse, organized within Unity Catalog and stored in the landing zone of Azure Data Lake.
- Implemented API authentication using system-assigned managed identity credentials with Azure Identity in Databricks.
- Integrated unit testing for ADF pipelines within CI/CD workflows, executed between the build and deploy stages using Pytest.

Tata Consultancy Services *Mumbai, India*

Python Developer Jan-2022 – July-2025

- Developed a real-time invoice generation API that gets data from the government portal and posts it so that customers can download invoices based on the journal number or invoice number in T+1 business days in real time.
- Developed a Fetch GSTIN service API from the government portal of the customer GSTIN, populating the status, address and GST filing status in the TCS product to be refreshed based on the activity status of the customer GSTIN.
- Successfully Integrated 4-source applications to consume API Services in an application as an endpoint.
- Wrote unit tests using Pytest, achieving more than 50% code coverage of API Endpoints.

PROJECTS

Sumitomo Mitsui Banking Corp. (Capgemini) July-2025– Present

- **Designed and developed a unified REST API service** to orchestrate Azure Data Factory (ADF) pipelines, enabling dynamic execution of ETL workflows for large-scale data movement across global banking datasets.
- **Implemented secure, cloud-native authentication and pipeline orchestration** using Azure Managed Identity, Databricks notebooks, and ADF, ensuring fully automated data transformations and governance under Unity Catalog.
- **Enhanced production reliability and CI/CD quality** by integrating Pytest-based unit tests for ADF pipelines within Azure DevOps, resulting in improved deployment accuracy and reduced operational issues.

Key Impact

- Improved orchestration efficiency and reduced manual triggers for ETL workflows.
- Strengthened data quality and observability across multi-region data ingestion pipelines.
- Enabled standardized, reusable pipeline triggering framework for cross-functional teams.

GST Tax Engine (TCS) Jan-2022-July-2025

- **Developed REST APIs in Python** for real-time invoice generation and GSTIN status retrieval by integrating with government tax portals, enabling automated compliance workflows for enterprise clients.
- **Analysed large-scale GST transaction data** using complex SQL queries to derive insights on customer behaviour, revenue patterns, and tax compliance—contributing to strategic decision-making for product teams.
- **Improved reliability and usability of the GST Tax Engine** by integrating multi-source applications with API endpoints and implementing Pytest-based unit tests to maintain consistent code quality.

Key Impact

- Achieved faster and more accurate invoice processing, reducing turnaround time to **T+1 business day**.
- Increased API reliability and stakeholder trust by improving coverage and reducing integration issues.
- Delivered actionable insights that improved product planning and client reporting efficiency.

EDUCATION

- Noth Maharashtra University *Jalgaon, India*
- **Bachelor of Technology** in Chemical Engineering 2017 – 2021

CERTIFICATIONS

- **Microsoft Azure Fundamentals:** https://learn.microsoft.com/api/credentials/share/en-us/VaibhavLohar-7044/6EDD0C93170A1F1B?sharingId=76D2B41853AC37D6
